
Medfusion Pay: Patient-Friendly Payment Methods to Increase Revenue

Over 30% of your revenue now comes directly from your patients' pockets – and with the rise in High Deductible Health Plans, that number is increasing fast. If your portal, payment collection options, and processing service are not working together to help patients seamlessly pay their bills, you are shortchanging your practice.

Medfusion Pay offers 7 convenient ways for your patients to pay their bills quickly and electronically before, during and after their appointments. The result is you get paid more, faster, and with less effort on the part of your staff because many reconciliation functions are integrated directly to your PM system.

7 convenient ways for your patients to pay

1. Pre Check

A mobile-optimized check-in app and monitoring dashboard that finishes pre-work and collects payment before the patient arrives for their appointment.

2. Point of Sale Terminal

An easy way to accept credit and debit card payments in office with our EMV/NFC terminals.

3. Virtual Terminal

Accept credit and debit card payments over the phone with our virtual card swipers.

4. PayHere

Patients or caregivers can pay their bills right from your website or the portal sign-in page with our PayHere payment feature that does not require a portal account.

5. Online Bill Pay

Patients can quickly pay bills through the patient portal.

6. Payment Plans

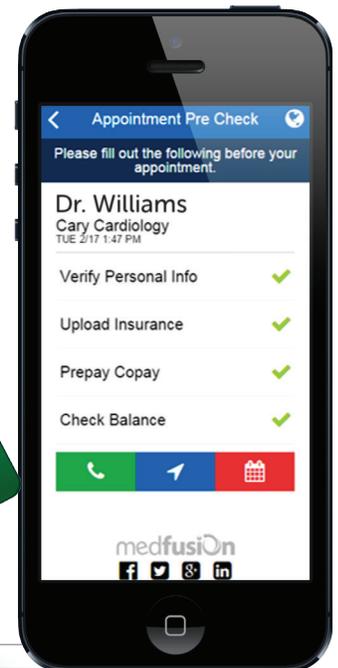

Patients can work with your staff to set up an automatic draft payment plan to settle balances over time.

7. eStatements and Printed Statements

By gradually shifting patient payments from printed to electronic statements, you can dramatically reduce your billing costs. With our “better together” solution you deliver one billing file and will get a fast, accurate statement that meets patient preferences.

Medfusion Pay Merchant Service and Pay Dashboard offers 7 ways to pay, one way to reconcile! With our merchant service and reporting dashboard, every payment is tracked and can be searched by patient, location, provider and 8 other attributes. No matter how a payment comes in, everything is consolidated in one place so your staff can save time with one-stop balancing and reconciliation.

Medfusion has handled over **7.5 million patient payments** totaling over three-quarters of a billion dollars.
