

Medfusion: More Than Just a Portal Partner

As the top EMR-agnostic portal company, we know our partners are critical to our success. Here are 5 ways we ensure ours will be a successful business partnership:

Medfusion's portal was rated **highest by KLAS** in their "Patient Portal 2015" report.

With **API support** available for all major features, discrete data can securely flow between your EMR and the portal, reducing staff workflow steps and time. (See back for detail on API support.)

The portal supports **all secure communication** needs of a practice -- messaging, appointment requests, prescription renewal requests, bill pay, registration and health forms, staff questions and more.

Customer success is a top priority at Medfusion so we offer not only a world class Customer Care team but also training, patient marketing materials and videos, live chat patient support and a wealth of information in our online Help Center to ensure practices and partners have everything they need to be successful.

We recognize that our partners own the relationship between your business and your customers. Our role is to support and empower our partners to achieve mutual goals. **Our success is your success.**

Medfusion APIs for Discrete Data Integration

Medfusion offers a variety of integration APIs to enable discrete data flow from your PM/EMR system to the portal. Integration dramatically reduces the number of clicks it takes staff to complete routine workflows

Supported APIs

- Patient Invitations
- CCDs
- Events
- Administrative Messages
- Appointment Requests
- Prescription Renewal Requests
- Forms
- Payments
- Bulk Messaging

Medfusion Pay

Medfusion offers a suite of patient payment solutions that are fully integrated with the portal. From our appointment reminder-triggered Pre Check app to eStatements, Medfusion Pay ensures practices are paid more, faster.
