

Integration to
Centricity® CPS/cEMR

One Integrated Solution for Every Patient Touch Point

Medfusion has 11 years of expertise working with Centricity clients. Our deep integration and Centricity-specific capabilities, including self-scheduling, pre-check, & online bill pay deliver unmatched value to the Centricity base.

Self-Scheduling

- Flexible, rules-based scheduling
- Dramatically reduces phone calls
- Up to 50% reduction in no shows
- Electronic appointment reminders with utilization dashboard & tracking

Pre-Check

- Collect co-pays & outstanding balances
- Decrease appointment cancellations
- Complete forms prior to appointment
- Insurance card image capture

Forms

- Discrete data flows to Centricity
- Customizable form templates to meet your needs
- Build forms from scratch & map to custom or standard observation terms

Patient Communications

- Secure messaging with flexible routing rules
- Appointment & prescription renewal requests
- Automated & mass messaging within Centricity

Bill Pay & Payment Reporting

- Guest pay from any website
- Online Bill Pay with card on file
- Paper & eStatements
- Customizable payment plans
- Consolidates all payments into reconciliation & funding reports

Medfusion & Centricity

- 220+ clients
- 4,000+ providers
- 1.5 million patient users
- 1.4 million transactions per month
- 98% of users utilize multiple solutions
- Average 9 solutions per client

"Medfusion has everything we need in one great package. With Medfusion we truly got a partner."

- Centricity client

Integrated features that save you time and clicks.

Intelligent, online scheduling integrated with CPS

Control which appointments patients book within your CPS schedule, while accounting for complex schedule rules. Patient Self-Scheduling drastically reduces call volume & gives your patients 24/7 scheduling access to your pre-determined appointment types. Electronic reminders & confirmations lets patients view reminders, cancel & reschedule via the same easy process.

Integrated mass messaging and automated messaging to patients from within CPS and cEMR

Deliver documents, including patient education, to the patient via a secure message, using a wide variety of configuration options. Harness chart inquiries to send mass messages to targeted patients.

Automate your Transition of Care (TOC) Workflow

Medfusion now offers provider-to-provider messaging through an industry leading Health Information Services Provider (HISP), Secure Exchange Solutions. The integrated workflow simplifies sending automatically generated Transition of Care documents when a referral order is signed.

Pre- Check

Get paid faster! Collect money owed & outstanding balances prior to the appointment. Patients can confirm personal information, provide insurance & submit a co-pay before they walk in the door. Electronic pre-check reminders linked to forms reduce no-shows, & stream-line your patient intake process.

MACRA and MU3 Support

Medfusion has updated our capabilities to help you meet the changes for existing & new objectives brought about with the new Medicare Access & CHIP Reauthorization Act (MACRA) & MU3. Our software is 2015 Edition end-to-end certified with GE. This allows you to access the updated patient engagement related events in CQR.
